Identification of Special Needs & Abilities

The Board of Education recognizes that each student is unique, and, although for most students the regular school program is appropriate, many students have exceptional needs that cannot be met with regular programming only.

The Superintendent of Schools shall:

1. Develop and promulgate regulations and procedures to identify students with exceptional needs;
2. Develop plans for assessment and evaluation of specific needs of each student identified to have exceptional needs. The assessment plan shall be a description in ordinary language of procedures, tests, records, or reports proposed for use in student assessments.

The assessment and evaluation plans shall be consistent with provisions of federal and state laws and regulations.

(cf. 6159 Individualized Education Plans)
